Committed to Preserve Environment

AM SIS Engineering Private Limited

AM SIS Engineering Private Ltd, headquartered in Kollam , Kerala is an engineering organization with a mission to preserve and protect our environment through innovative engineering solutions.

AM SIS operates branches in Thiruvananthapuram, Thrisur and Kannur.

Our team comprises seasoned Engineering and Management professionals with extensive experience across the oil & gas, petrochemical, refinery, renewable energy, and environmental sectors. We specialize in engineering, procurement, and construction projects worldwide.

We prioritize treating wastewater to ensure it is environmentally safe, reflecting our commitment to social responsibility. Partnering with Thermax Ltd, an Indian multinational corporation known for its clean air, clean energy, and clean water solutions, we deliver advanced and sustainable technologies.

Our goal is to offer comprehensive solutions tailored to diverse needs, focusing on total water management for industries, urban areas, and communities. Our products serve clients across various sectors, including Food & Beverages, Automobile, Textile, Pharma, Refinery, Distillery & Breweries, Fertilizer, Plywood, Hospitality, Hospitals, Paint, Pulp & Paper, Cement, Poultry, Power Plant, and Tyre Manufacturing.

We provide clients with new technology installations, maintenance of existing processes, supply of genuine spares, and various service contracts such as Annual Maintenance Contracts (AMC), Operations and Maintenance, One-Time Services, Revamping, and Modifications.

Our core values are Safety, Governance, Cost-Effectiveness, and Innovation.

VISION

AMSIS envisions offering sustainable solutions in Energy and Environment, remaining steadfast in our commitment to environmental preservation.

MISSION

AMSIS is dedicated to preserving our environment by ensuring clean water & air. We address water scarcity by providing safe water, recycling wastewater, and utilizing treated recycled water.

AMSIS OPERATES THROUGH THREE PRIMARY BUSINESS DIVISIONS:

Project Management

Design, supply, and installation of engineering solutions for energy and environmental applications.

Trading

Supply and installation of innovative products from original manufacturers (OEM), ensuring timely delivery and service.

Services

Pre and post-delivery services, supply of genuine spares, inspection, training, audits, certifications in Safety & Quality, Electrical & Instrumentation (E&I), Non-Destructive Testing (NDT) for the Oil & Gas, Petrochemical, Refinery, and Renewable Energy sectors.

PRODUCTS AND SERVICES

- Water Treatment Plants
- Sewage Treatment Plants
- Effluent Treatment Plants
- Zero Discharge Solutions
- Process Cooling Solutions
- Building & Construction Chemicals
- Air Pollution Equipment
- Analytical Instruments
- Welding & NDT Machines/Consumables
- Revamping, Retrofits, & Automation
- Fabrication & Erection of Mechanical Systems
- Heating Solutions
- Renewable Energy Solutions
- Annual Maintenance Contracts
- Operations and Maintenance Contracts
- One-Time Services

AMSIS Engineering Private Limited stands as a trusted partner in delivering sustainable engineering solutions, with a steadfast commitment to innovation, safety, and environmental preservation.
